Art Unit: 3722

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,669,207. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is obvious that the serrations would be circumferentially disposed about and rotationally fixed with respect to the rear section of the body, as there is no other way that they could be placed on the body.

3. In order for the record to be complete, the examiner will make a comment about the prosecution of the parent '207 patent. In the prosecution of the parent '207 patent, the examiner had stated in the first Office action that there was no disclosure in the specification of the rear section of the body including serrations, and that only the thrust ring 50 was disclosed as having such serrations. Applicant in response argued that those skilled in the art do consider the thrust ring as part of the body. Figure 2 of Sakamaki '439 shows such a thrust ring at 22. Column 4, lines 20-21 read in part, "seat 22 forming part of the main body 1...." Therefore, the thrust ring is considered as part of the body, and there is disclosure supporting the claimed subject matter.
